centific

Build the future of AI

Centific Premier Hackathon 2.0

From April 20th to May 3rd, immerse yourself in a two-week residential AI innovation sprint — collaborating closely with world-class engineers, researchers, and product leaders in **Hyderabad's HITEC City.**

2 Weeks
Residential innovation sprint in Hyderabad's HITEC City

100+ open positions
200+ Hackathon participants to take up challenges in AI

100%
Prior internship-to-FTE conversion rate

Why Apply

More Than a Hackathon

01
Elite Mentorship
Work directly with AI leaders, architects, and researchers shaping the global AI landscape.

02
Real Challenges
Solve high-impact, real-world AI product and platform problems — not toy datasets.

03
Executive Visibility
Present breakthrough solutions directly to senior leadership and decision-makers.

04
Career Gateway
Opportunity to work in the area of AI and Data Productization.

05
Collaborative Environment
Build alongside exceptional peers across AI Products, Platforms, and R&D.

06
Accelerated Growth
Rapidly expand skills, confidence, and career readiness in a real innovation environment.

Program Structure

Two Weeks, Four Phases

Week 1
Orientation & Immersion
Challenge brief, team formation, and domain deep-dive with expert leads.

Mid Week 1
Mentor Clinics
Hands-on sessions across product, AI, R&D, and design with senior mentors.

Week 2
Build Sprint
Prototype, validate, iterate, and sharpen your solution and narrative.

Final Day
Leadership Showcase
Present your work to Centific's senior leadership and decision-makers.

Innovation Streams

Seven Tracks, One Ecosystem

01 Cognitive AI Innovation Fellowship

Advanced AI concepts, cognitive technologies, and cutting-edge model experimentation. Associate Architect pathway.

02 AI Research & Engineering

Designed for participants interested in working on real world AI use cases and applying AI technologies to practical applications while gaining hands on experience in building intelligent solutions. Selected Individuals from the Hackathon will be given a career opportunity in the role of AI research Engineer or Research Scientist (PHDs).

03 Core AI Model Engineering

GenAI, NLP, CV, RL, SLM fine-tuning, VLMs, and high-performing multi-agent systems at enterprise scale.

04 Computer Vision Engineering

Vision models, multimodal LLMs, detection systems, and real-time processing on edge and cloud.

05 AI System Engineering

Scalable AI infrastructure, model deployment, and production-grade systems. Associate Engineer (AI Product R&D) pathway.

06 AI Product Strategy*

Own the product vision end-to-end — from concept to deployment — acting as the CEO of an AI product.

07 AI Workforce Operations Lab*

Designed for participants interested in solving real-world operational challenges in AI workforce platforms. This role focuses on leveraging data and research to improve platform workflows, contributor onboarding, payment transparency, and task allocation within a global crowdsourcing ecosystem. Participants will analyze how data is collected, curated, and prepared for AI development, while proposing practical solutions to improve data quality, operational efficiency, and contributor experience across the platform.

Who Should Apply

Eligibility & What You Gain

* Tracks 6 & 7 are open for Management Participants only, other tracks open for Technical Participants only

Requirements

- Open to students from any university or academic stream
- Minimum CGPA of 7.0 required
- Graduating batches: 2024, 2025, 2026, and 2027
- Working professionals welcome — evaluated on current experience
- All seven tracks open to lateral applicants

What You Gain

- Two-week residential program in Hyderabad's HITEC City
- Mentorship from world-class AI leaders and practitioners
- Clear pathway to full-time employment with leading compensation
- 100% prior internship-to-FTE conversion track record

Career Pathway

From Hackathon to Full-Time Career

Top Performing AI talent from the Hackathon will receive an employment offer to work out of Centific Innovation centers in Hyderabad and Chennai

100% Prior Conversion Rate

Attractive Gadgets and other Prizes to be won

01 Apply & Get Selected

Submit your application and get invited to the hackathon.

02 Two-Week Innovation Sprint

Residential program in Hyderabad — build, learn, and compete.

04 Full-Time Role

Industry-leading compensation and a long-term career at Centific.

03 6-Month Paid Internship

Join Centific's AI Product teams and work on real innovation.

This Is Your Moment.

Registrations close on March 28th at 11:59 p.m.
